The information in this report that relates to exploration results has been compiled by Mr Hem Shanker Madan who is a Member of The Australian Institute of Mining and Metallurgy. Mr Madan is the Managing Director of the Company. Mr Madan has in excess of the minimum of 5 years experience which is relevant to the style of mineralisation under consideration and qualifies as a Competent Person as defined in the 2004 Edition of the "Australasian Code for Reporting of Mineral Resources and Ore Reserves (the JORC Code)." Mr Madan consents to the inclusion in this report of the matters based on his information in the form and context in which it appears.

COMPANY PROFILE

Alara Resources Limited (ASX Code: AUQ) is an Australian based mineral exploration and development company with a portfolio of uranium, gold and mineral sands exploration projects in Peru and Australia (Northern Territory and Western Australia):

PROJECTS	LOCATION	AREA (HECTARES)
(1) Mt James Uranium	Gascoyne, Western Australia	99,861
(2) Bigrlyi South Uranium	Northern Territory	166,565
(3) Crucero Uranium	Peru	4,100
(4) Santa Rosa Uranium	Peru	4,400
(5) Pampacolca Uranium	Peru	4,400
(6) Coasa Uranium	Peru	9,600
(7) Canning Well Base Metals/Uranium	Pilbara, Western Australia	26,400
(8) Kimberley Phosphate	Kimberley, Western Australia	132,701
(9) King Sound Mineral Sands	Kimberley, Western Australia	65,200

The global financial crisis continues to have significant adverse effects on capital markets and the aspirations of resource exploration companies such as Alara. Whilst Alara is in a relatively sound cash position (\$7.75 million as at 31 December 2008), it has undertaken a strategic decision to conserve cash for high priority/value opportunities within the resource sector.

Alara has therefore reduced exploration expenditure on existing projects deemed to be of lower priority – being the Crucero, Canning Well, Santa Rosa, Pampacolca and Coasa Project areas (the Kimberley Phosphate and King Sound Mineral Sands Project tenements are pending grant).

Alara has reviewed and discounted a number of exploration opportunities and is undertaking an on-going investigation of a number of prospective opportunities in the resources sector throughout the world. This includes applying for mineral concessions, entering into joint ventures, taking options over and acquiring concessions or tenements and investing in listed securities in the resources sector.

The Alara Board comprises members with extensive experience in the resources sector, being **Chairman, Dr John Stephenson**, previously Exploration Director for Rio Tinto Australasia with more than 35 years experience in mineral exploration and **Managing Director, Mr H. Shanker Madan**, an experienced senior geologist with more than 30 years of world-wide experience in the exploration and evaluation of mineral deposits for various commodities and **Executive Director, Mr Farooq Khan** who has extensive experience in corporate law, the securities industry, capital markets and the executive management of ASX listed companies.

On 23 September 2008, the Company changed its name from Alara Uranium Limited to Alara Resources Limited.

Alara currently has the following securities on issue:

	Quoted	Not Quoted or Subject to Escrow	Total
Fully paid ordinary shares	56,011,285	24,496,215	80,507,500

PROJECT LOCATION

PERUVIAN PROJECTS

The location of Alara's uranium project areas in Peru are shown on the map below.

AUSTRALIAN PROJECTS

The location of Alara's Australian projects in the Northern Territory and Western Australia are shown on the map below.

COMPANY PROJECTS

1. MT JAMES (GASCOYNE, WESTERN AUSTRALIA)

Alara is exploring for uranium using detailed structural analysis coupled with aerial and ground radiometric surveys.

The exploration focus will be on high priority radiometric anomalies selected from an airborne geophysical survey conducted during 2008. In addition, known historical workings (drill holes and costeans) that encountered uranium mineralisation and the untested anomalies previously identified by AGIP Nucleare (Australia) Pty Ltd (**AGIP**), (a subsidiary of Italian multi-national energy group ENI) will be the target of detailed ground prospecting followed by drilling.

Subject to heritage and regulatory approval, Alara proposes drilling of the best radiometric anomalies.

2. BIGRLYI SOUTH (NORTHERN TERRITORY)

The project tenements are located principally in the northern part of the Ngalia Basin in the Northern Territory (located approximately 390 kilometres north-west of Alice Springs).

Alara has completed an airborne radiometric and magnetic survey in exploration licences EL 24879, EL 24928, EL 24929 and EL24930. Results indicate that the Southwark Granite Suite has a strong radiometric signature in all channels. These are "hot" granites and are potentially good source rocks for sedimentary-style uranium deposits in the overlying younger sediments – as being the probable source of mineralisation in the Bigrlyi uranium deposits located immediately north of Alara's Bigrlyi South tenements. Field verification of Alara's radiometric anomalies within EL24879, EL24928 and EL24929 identified several uranium anomalies coinciding with the outcropping Mt Eclipse Sandstone unit (host to the Bigrlyi deposits). The majority of the other anomalies were located within predominantly sand covered terrain.

Alara has submitted a Mine Management Plan to the Central Land Council (**CLC**) seeking heritage approval for drilling selected anomalous targets. Negotiations with the CLC are on-going.

3. CRUCERO PROJECT (PERU)

The Crucero Project concessions are located 45 kilometres southeast of the town of Crucero, in the Macusani district in southern Peru.

Alara is targeting uranium mineralisation hosted by rhyolitic ignimbrites and ash flows of the Picotani Formation of Miocene-Pliocene age. This formation hosts several occurrences of uranium in the Macusani district.

A radiometric survey has been completed over the highest priority parts of the Lituania 3 concession, comprising 19 lines totaling 20 line-kilometres. Uranium mineralisation occurs in volcanic tuffs as disseminated autunite in sub-vertical fractures up to several centimetres wide on either side of the fractures. The mineralised fractures are oriented north-south and east-west. Uranium mineralisation is commonly associated with smoky quartz.

No further field work is planned at this stage in the area, to conserve cash for other more advanced opportunities within Alara's existing portfolio and new opportunities.

4. CANNING WELL (PILBARA, WESTERN AUSTRALIA)

The project area is located approximately 20 kilometres of the north-south trending Canning Fault and associated splay and intersecting faults. This complex of faults brings together rocks of the Archaean Fortescue Group into direct contact with younger Proterozoic rocks of the Manganese Groups, the Tacunyah Group, the Yeneena Supergroup and the Savory Group.

Alara is exploring for uranium, gold, copper and base metal mineralisation within the project tenements. A mag/lag sampling programme targeting gold and copper anomalies has been completed and analysis highlights include 52ppb Au, 16ppb Au, 1690ppm Pb, 580ppm Zn, 98ppm Cu and 9.6% Mn.

An 8 RC drill hole programme for a total of 800 metres over one of the four (4) prominent base metal anomalies has been completed. Drilling was conducted within a surface area 1,600 metres long and 600 metres wide. The drill holes intersected up to 1.3ppm silver over one metre in carbonaceous and dolomitic siltstones. Average thickness of the anomalous silver zones in each hole was 50 metres. Although not economic, this is an encouraging find and commends further search for a large strata bound base metal deposit in the tenements.

Alara believes further work is warranted around several Geotem geophysical anomalies that have previously been identified by Rio Tinto within the tenements.

However no further field work is planned at this stage in the area, to conserve cash for other more advanced opportunities within Alara's existing portfolio and new opportunities.

COMPANY PROJECTS

5. SANTA ROSA PROJECT (PERU)

The Santa Rosa Project comprises six concessions covering an area of 4,400 hectares. The concessions are located between 2 and 5 kilometres northwest of the town of Santa Rosa, in the Macusani district of southern Peru.

Rhyolitic lava flows of the Permian Mitu Group lie adjacent to an unconformity with Lower Paleozoic schist. The lavas are the main targets for uranium mineralisation. Large geochemical anomalies of over 1500ppm uranium have been reported by IPEN from chip samples adjacent to the unconformity in the region.

Alara has completed a reconnaissance survey but no further field work is planned at this stage in the area, to conserve cash for other more advanced opportunities within Alara's existing portfolio and new opportunities.

6. PAMPACOLCA PROJECT (PERU)

The Pampacolca Project comprises seven concessions covering an area of approximately 4,400 hectares. The concessions are situated approximately 4 to 12 kilometres south of the town of Pampacolca, which is located approximately 136 kilometres northwest of the city of Arequipa in southern Peru.

The Pampacolca Project comprises structurally controlled occurrences of uranium, tantalum and rare earths in pegmatite veins and dykes hosted by quartz-muscovite-feldspar schist. These occurrences lie within Pre-Cambrian gneissic terrain with known tantalum mineralisation.

Alara has completed a sampling and ground radiometric survey of anomalous areas identified as being prospective for uranium mineralisation. However, no further field work is planned at this stage in the area, to conserve cash for other more advanced opportunities within Alara's existing portfolio and new opportunities.

7. COASA PROJECT (PERU)

The Coasa Project comprises 11 concessions covering an area of 9,600 hectares. The concessions are centred on the town of Coasa, located in the Macusani district in southern Peru.

The target is pegmatite veins and dykes. Historic IPEN data indicate anomalies up to 1900ppm uranium within the project area.

Reconnaissance mapping and sampling has identified pegmatitic zones of several metres width with two rock chip samples returning 500ppm and 470ppm uranium.

Alara has completed an Aster interpretation over the project area. However, no further field work is planned at this stage in the area, to conserve cash for other more advanced opportunities within Alara's existing portfolio and new opportunities.

8. KIMBERLEY PHOSPHATE PROJECT (KIMBERLEY, WESTERN AUSTRALIA)

Alara has identified areas of the West Kimberley region of Western Australia as being a favourable geological environment for economic phosphate deposits. Alara recently applied for five exploration licences (E04/1855-59) that now form the Kimberley Phosphate Project. Within Alara's E04/1859 tenement application, the Geological Survey of Western Australia reports on a WAPET Barlee bore that intersected a 10 metre interval of the Jarlemai Siltstone containing an elevated interval of P₂O₅ averaging 5.7% P₂O₅.

A previous explorer in 1967, Mines Exploration Pty Ltd, reported a phosphatic nodule bed at Langey Crossing. Recent price rises in phosphate have led Alara to revisit this vicinity as being a region of potential economic significance.

The project tenements are pending grant.

9. KING SOUND MINERAL SANDS PROJECT (KIMBERLEY, WESTERN AUSTRALIA)

Alara has through a joint venture (JV) with ASX listed Strike Resources Limited (Strike) a 70% interest in the King Sound Mineral Sands Project, currently comprising three tenement applications covering a total area of 652 square kilometres, located approximately 10 kilometres west of the port town of Derby in the West Kimberley region of Western Australia.

The JV has identified the King Sound area as being prospective for the accumulation of heavy minerals, such as zircon, rutile and ilmenite.

The project tenements are pending grant.

DIRECTORS' REPORT

The Directors present their report on Alara Resources Limited (**Company** or **Alara** or **AUQ**) and its controlled entities (the **Consolidated Entity**) for the financial half year ended 31 December 2008 (**Balance Date**).

On 17 September 2008, shareholders approved a change of company name from Alara Uranium Limited to Alara Resources Limited. This was confirmed by the Australian and Securities Commission (**ASIC**) on 23 September 2008. The Company's ASX Code – AUQ – remains unchanged.

Alara has prepared a consolidated financial report incorporating the entities that it controlled during the financial half year. Controlled entities were:

- (1) Alara Operations Pty Ltd ABN 123 780 441 (formerly Strike Uranium Pty Ltd) (**AO**), a wholly owned subsidiary incorporated in Western Australia on 5 February 2007;
- (2) Hume Mining NL ABN 52 063 994 945 (**Hume**), a wholly owned subsidiary acquired on 18 May 2007;
- (3) Alara Peru Operations Pty Ltd ABN 124 334 103 (**APO**), a wholly owned subsidiary acquired on 18 May 2007;
- (4) Alara Peru S.A.C. (**AP**), a wholly owned Peruvian subsidiary of APO.

DIRECTORS' REPORT

world. This includes applying for mineral concessions, entering into joint ventures, taking options over and acquiring concessions or tenements and investing in listed securities in the resources sector.

However, Alara recognises that, with its relatively limited, although sound, cash reserves, the significant expenditure required to evaluate and develop resource projects to a stage where positive cashflows can be generated and or a return on investment realised, and the state of the financial markets making capital raisings to replenish company funds difficult, an opportunity exists where Alara can invest in "undervalued" listed resource companies and share in the upside from the exploration and project development success of the investee companies. This investment strategy would provide Alara with the ability to convert liquid investments into cash to meet its own exploration and evaluation aspirations from time to time. Alara would focus on its investment strategy on well funded companies, with experienced management, with projects with prospects to deliver positive cashflow in the short to medium term, and the potential (based on its sound cash reserves) to secure interests in significantly sized new project opportunities in the resources sector worldwide.

BOARD OF DIRECTORS

Information concerning Directors in office during or since the financial year is as follows:

John Stephenson	Chairman
<i>Appointed</i>	18 May 2007
<i>Qualifications</i>	BSc (honours) in Geology from the University of London through the former University College of Rhodesia and a PhD in Geology from the University of Manitoba, Canada.
<i>Experience</i>	Dr Stephenson is a highly experienced geologist with over 37 years experience in the mining sector. He has held senior positions in large mining companies, most recently as Exploration Director for Rio Tinto Australasia where he led Rio Tinto's exploration activities for five and a half years based in Perth. Dr Stephenson has also during his career led and managed exploration teams for both junior and major mining companies in several parts of the world, mainly in Southern and East Africa, North America and Australia exploring for gold, uranium, diamonds and base metals. He has also been involved with projects in Europe, South America and India. He led teams responsible for the discovery of a world class diamond deposit, the Diavik diamond mine in Canada's Northwest Territories for which he recently received an award; and a high grade gold deposit, the former Golden Patricia gold mine in Ontario. Dr Stephenson has particular experience in the uranium sector having in the early to mid 1970's led reconnaissance airborne and ground surveys for uranium in Canada. Between 1978-1981, Dr Stephenson headed the ground follow-up of a country-wide airborne radiometric and magnetic survey for uranium and other minerals in Tanzania. In the early 90's Dr Stephenson led exploration for a subsidiary of Rio Tinto exploring for uranium and base metals in eastern Canada. Dr Stephenson also led Rio Tinto's exploration activities in Australia in the late 90's which included the search for uranium.

NOTES TO THE FINANCIAL STATEMENTS

for the half year ended 31 December 2008

1. SIGNIFICANT ACCOUNTING POLICIES

Statement of compliance

The half-year financial report is a general purpose financial report prepared in accordance with the Corporations Act 2001, AASB 134 'Interim Financial Reporting' and other authoritative announcements of the Australian Accounting Standards Board. The half-year financial report does not include notes of the type normally included in an annual financial report and shall be read in conjunction with the most recent annual financial report.

Basis of preparation

These consolidated interim financial statements (the interim financial statements) have been prepared in accordance with the accounting policies adopted in the last annual financial statements for the year to 30 June 2008. The accounting policies have been applied consistently throughout the Consolidated Entity for the purposes of preparation of these condensed consolidated interim financial statements.

The following applicable standards have been issued but have not been early adopted:

- AASB 101 *Presentation of Financial Statements (Revised 2007)*
- AASB 8 *Operating Segments*
- AASB 123 *Borrowing Costs (Revised 2007)*

AASB 101 (Revised 2007) makes certain changes to the format and titles of the primary financial statements and to the presentation of some items within these statements. It also gives rise to additional disclosures. The measurement and recognition of the Consolidated Entity's assets, liabilities, income and expenses is unchanged. AASB 101 affects the presentation of owner changes in equity and introduces a 'Statement of comprehensive income'. Further, a 'Statement of changes in equity' is now presented as a primary statement.

AASB 8 now reports segment results based on internal management reporting information that is regularly reviewed by the chief operating decision maker. In the previous annual and interim financial statements, segments were identified by reference to the dominant source and nature of the Consolidated Entity's risks and returns.

AASB 123 Borrowing Costs (Revised 2007) requires the capitalisation of borrowing costs to the extent they are directly attributable to the acquisition, production or construction of qualifying assets that need a substantial period of time to get ready for their intended use or sale. Borrowing costs have been capitalised only for qualifying assets with a commencement date after 1 January 2009.

Reporting Basis and Conventions

The half-year report has been prepared on an accruals basis and is based on historical costs modified by the revaluation of selected non-current assets, financial assets and financial liabilities for which the fair value basis of accounting has been adopted and applied.

2. LOSS FOR THE HALF YEAR

The operating loss before income tax includes the following items of revenue and expense:

Exploration and evaluation expenditure impairment	(6,479,519)	(196,205)
Balance at the end of the year	<u>-</u>	<u>5,885,528</u>

The Directors have made a strategic decision to conserve the Company's cash for high priority/value opportunities within the resource sector. The Company has therefore reduced exploration expenditure on existing projects deemed to be of lower priority – being the Crucero, Canning Well, Santa Rosa, Pampacolca and Coasa Project areas (the Kimberley Phosphate and King Sound Mineral Sands Project tenements are pending grant). In accordance with AASB 136: Impairment of Assets, an impairment loss has been recognised for the half-year in relation to the Company's capitalised exploration and evaluation expenditure.

		<u>60,367,500</u>	<u>603,797</u>	<u>603,797</u>

The Option Reserve records the consideration (net of expenses) received by the Company on the issue of options.

Equity based remuneration

On 15 August 2008, the Company entered into deeds of cancellation with Directors and Employee option holders to cancel all Directors' and Employees' options (save for 500,000 \$0.55 (26 July 2012) Unlisted Employees' Options held by one employee). The options were cancelled as part of a review of the Company's directors and employee options.

On 17 September 2008, 1,485,000 \$0.35 (16 September 2013) Employees' Options were granted to 7 employees of the Company upon receiving shareholder approval.

On 17 September 2008, 17,300,000 \$0.35 (16 September 2013) Directors' Options were granted to 3 directors of the Company upon receiving shareholder approval.

The fair value of directors' and employees' options are expensed, from their date of grant, over their vesting period; fair values are determined as at date of grant using the binomial tree options valuation model that takes into account the exercise price, the term of the option, the underlying share price as at date of grant, the expected price volatility of the underlying shares and the risk-free interest rate for the term of the option. The Company is required to expense for the year, on the basis that the fair value cost at date of grant is apportioned over the vesting period applicable to each option.

- options are granted for no consideration and vest as described in the table above;
- exercise price is as described in the table above;
- grant date is as described in the table above;
- expiry date is as described in the table above;
- share price is based on the last bid price on ASX as at date of grant, as described in the table below;
- expected price volatility of the Company's shares has been assessed independently by BDO Kendalls Corporate Finance (WA) Pty Ltd, as described in the table below;
- expected dividend yield is nil;
- risk-free interest rate is based on the 5 year Commonwealth bond yield, as described in the table below.

Date of issue	Description of Unlisted Options	Vesting Criteria	Share Price at Grant Date	Risk Free Rate	Price volatility
17-Sep-08	\$0.35 (16 September 2013) Directors' Options	75% on grant and 25% on 16 September 2009	\$0.07	5.46%	95%
17-Sep-08	\$0.35 (16 September 2013) Employees' Options	50% on 16 March 2009, 25% on 16 September 2009 and 16 March 2010	\$0.07	5.46%	95%

8. COMMITMENTS

(a) Agreement with Sheridan Platinum Group Peru S.A.C in relation to Rosita 2007 Concession (Peru)

On 7 December 2007, Alara Peru S.A.C (a Peruvian subsidiary of the Company) entered into an agreement with Sheridan Platinum Group S.A.C. to acquire 100% of the uranium mineral rights (and vanadium, phosphates and other radioactive mineral rights associated with uranium production) in the Rosita 2 concession in consideration for US\$200,000 to be paid in 3 tranches - \$50,000 on execution, \$50,000 in 12 months and \$100,000 in 24 months.

Alara may withdraw from the agreement after making these payments and its obligations will cease after the date of withdrawal.

Alara is also liable for a royalty on all product mined and shipped from exploitation of these mineral rights as follows:

- (a) Within 5 years - the greater of 3% of net smelter value or gross sales value;
- (b) After 5 years - 5% of gross sales value.

(Alara may elect to reduce by 50% the rate of these royalties by payment of US\$1 million within 12 months of

An advance royalty payment of US\$25,000 per annum is payable after the initial 24 months from execution of the agreement.

(b) Kind Sound Farm-In and Joint Venture Agreement with Strike Resources Limited (Western Australia)

On 10 December 2007, Alara Operations Pty Ltd (an Australian subsidiary) entered into a farm-in and joint venture agreement with Strike Resources Limited (Strike) over Strike's King Sound Mineral Sands Project (comprising 3 exploration licence applications pending grant). Alara will earn a 70% interest in the tenements by funding the project to a "decision to mine" stage.

Alara may withdraw from the agreement on 30 day's notice to Strike with liability for its pro-rata share of the tenements' minimum expenditure commitments up to the date of withdrawal.

NOTES TO THE FINANCIAL STATEMENTS

for the half year ended 31 December 2008

8. COMMITMENTS (continued)

(c) Agreement with Epsilon Energy Limited in relation to EL 09/1195 and 09/1196 tenements (Western Australia)

On 11 February 2007, Alara Operations Pty Ltd entered into an agreement with Epsilon Energy Limited (ASX Code: EPS) for Alara to earn up to a 60% interest in two exploration licences (EL 09/1195 and EL 09/1196) totalling ~43,500 hectares by spending up to \$400,000 on exploration on the tenements within 2 years. These tenements are adjacent to Alara's tenements in the Mt James project area. Alara has a minimum commitment of \$200,000 within the first 12 months to earn a 51% interest with the right to earn an additional 9% interest by spending \$200,000 on the tenements within the second 12 months; Alara has the right to withdraw after the initial \$200,000 commitment with no further commitments beyond its pro-rata share of the costs required to keep the tenements in good standing up to the date of withdrawal.

(d) Mineral Tenement/Concession - Commitments for Expenditure

Australian tenements

In order to maintain current rights of tenure to exploration tenements, the Consolidated Entity is required to outlay lease rentals and meet minimum expenditure commitments of approximately \$360,000 over a 12 month period, based on Australian tenements which have been granted as at balance date. Financial commitments for subsequent periods are contingent upon future exploration and evaluation results and cannot be estimated. These obligations are subject to renegotiation upon expiry of the tenement lease or when application for a mining lease is made and have not been provided for in the accounts.

Peruvian concessions

The Consolidated Entity is required to pay annual license fees by 30 June of each year, currently charged at the rate of US\$3.00 per hectare per annum.

(e) Australian Heritage Protection Agreements

These agreements facilitate the preservation of aboriginal heritage through the protection of aboriginal sites and objects upon the grant of mining tenements in Western Australia. The Heritage Protection Agreements require the Consolidated Entity to conduct aboriginal heritage surveys prior to conducting exploration that is not low impact in nature and detail procedures to be followed if an aboriginal site is identified.

(f) Agreements with Peruvian Landowners and Community Groups

The Company notes that holding a mineral concession in Peru does not grant automatic access to the surface land. Notwithstanding an easement procedure is contemplated in Peruvian law, in practice, mining companies have to negotiate and enter into private agreements with landowners/community groups in order to have access to their land for the purposes of conducting mining activities (exploration, evaluation, development and mining). With respect to the Consolidated Entity's Peruvian concession, there are often multiple landowners/community groups who are affected by the Consolidated Entity's proposed mineral exploration and potential mining activities. To date, approvals have been sought and obtained on drilling on a programme by programme basis.

The obtaining of approvals from landowners/community groups can be complicated and time consuming. The Consolidated Entity will have to commit funds to community groups and or landowners to secure land access agreements to develop its Peruvian projects. There can be no guarantees as to the obtaining of such approvals or the terms upon which approvals are obtained. At this stage, it is not possible to quantify the potential financial obligation of the Consolidated Entity in this regard.

NOTES TO THE FINANCIAL STATEMENTS

for the half year ended 31 December 2008

9. CONTINGENT ASSETS AND LIABILITIES

Contingent assets and liabilities exist in relation to certain resource projects of the Consolidated Entity subject to the continued development and advancement of the same.

- (a) **Royalty to Orion Equities Limited** - The Consolidated Entity is liable to pay a royalty of 2% of gross revenues (exclusive of GST) to Orion Equities Limited from any commercial exploitation of any minerals from various Australian tenements - EL 24879, 24928, 24928 and 24729 and ELA 24927 (the Bigrlyi South Project tenements in the Northern Territory), EL 09/1253 (a Mt James Project tenement in Western Australia) and EL 46/629 and a right to earn and acquire a 85% interest in ELA 46/585 (excluding all manganese mineral rights) (the Canning Well Project tenements in Western Australia).
- (b) **Native Title** - The Consolidated Entity's tenements in Australia may be subject to native title applications in the future. At this stage it is not possible to quantify the impact (if any) that native title may have on the operations of the Consolidated Entity.
- (c) **Government Royalties** - The Consolidated Entity is liable to pay royalties on production obtained from its mineral tenements/concessions. For example, the applicable Government royalties in Peru is between 1 to 3% based on the value of production. At this stage, it is not possible to quantify the potential financial obligation of the Consolidated Entity under Government royalties.
- (d) **Directors' Deeds** - The Company has entered into deeds of indemnity with each of its Directors indemnifying them against liability incurred in discharging their duties as directors/officers of the Consolidated Entity. As at balance date, no claims have been made under any such indemnities and accordingly, it is not possible to quantify the potential financial obligation of the Consolidated Entity under these indemnities.

10. EVENTS AFTER BALANCE DATE

No matter or circumstance has arisen since the end of the financial period that significantly affected, or may significantly affect, the operations of the consolidated entity, the results of those operations, or the state of affairs of the consolidated entity in future financial periods.

DIRECTORS' DECLARATION

In accordance with a resolution of the directors of Alara Resources Limited made pursuant to sub-section 303(5) of the *Corporations Act 2001*, we state that:

In the opinion of the directors:

- (a) The financial statements and notes of the Consolidated Entity are in accordance with the *Corporations Act 2001*, including:
 - (i) giving a true and fair view of the Consolidated Entity's financial position as at 31 December 2008 and of its performance for the half year ended on that date; and
 - (ii) complying with Accounting Standards AASB 134 "Interim Financial Reporting" and *Corporations Regulations 2001*; and
- (b) There are reasonable grounds to believe that the Company will be able to pay its debts as and when they become due and payable.

Independent Auditor's Review Report To the Members of Alara Resources Limited

We have reviewed the accompanying half-year financial report of Alara Resources Limited (the Company) and consolidated entity, which comprises the consolidated balance sheet as at 31 December 2008, and the consolidated income statement, consolidated statement of changes in equity and consolidated cash flow statement for the half-year ended on that date, a statement of accounting policies, other selected explanatory notes and the directors' declaration. The consolidated entity comprises both the Company and the entities it controlled at the half-year's end or from time to time during that half-year.

Directors' responsibility for the half-year financial report

The directors of the Company are responsible for the preparation and fair presentation of the half-year financial report in accordance with Australian Accounting Standards including the Australian Accounting Interpretations and the Corporations Act 2001. This responsibility includes establishing and maintaining internal control relevant to the preparation and fair presentation of the half-year financial report that is free from material misstatement, whether due to fraud or error; selecting and applying appropriate accounting policies; and making accounting estimates that are reasonable in the circumstances.

Auditor's responsibility

Our responsibility is to express a conclusion on the consolidated half-year financial report based on our review. We conducted our review in accordance with Auditing Standard on Review Engagement ASRE 2410: Review of an Interim and Other Financial Reports Performed by the Independent Auditor of the Entity, in order to state whether, on the basis of the procedures described, we have become aware of any matter that makes us believe that the financial report is not in accordance with the Corporations Act 2001 including giving a true and fair view of the consolidated entity's financial position as at 31 December 2008 and its performance for the half-year ended on that date; and complying with Accounting Standard AASB 134: Interim Financial Reporting and the Corporations Regulations 2001. As the auditor of Alara Resources Limited, ASRE 2410 requires that we comply with the ethical requirements relevant to the audit of the annual financial report.

A review of a half-year financial report consists of making enquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Australian Auditing Standards and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Grant Thornton (WA) Partnership ABN 17 735 344 518, a subsidiary or related entity of Grant Thornton Australia Limited ABN 41 127 556 389.

Grant Thornton Australia Limited is a member firm within Grant Thornton International Ltd. Grant Thornton International Ltd and the member firms are not a worldwide partnership. Grant Thornton Australia Limited, together with its subsidiaries and related entities, delivers its services independently in Australia.

Liability limited by a scheme approved under Professional Standards Legislation.

Independence

In conducting our review, we complied with the independence requirements of the Corporations Act 2001.

Conclusion

Based on our review, which is not an audit, we have not become aware of any matter that makes us believe that the half-year financial report of Alara Resources Limited is not in accordance with the Corporations Act 2001, including:

- a. giving a true and fair view of the consolidated entity's financial position as at 31 December 2008 and of its performance for the half-year ended on that date; and
- b. complying with Accounting Standard AASB 134: Interim Financial Reporting and Corporations Regulations 2001.
